

Dear Samuel, Mark, and Sofia,

I am currently undergoing the process of setting up the tools for this job. My GitHub and VSCode were set up before this, and I have successfully created an Azure free account with my GitHub and joined the 365 Developer Program. However, I am currently running into an issue where I cannot set up the Microsoft 365 E5 developer subscription, as when I log into the Microsoft 365 Developer Program, I only get the message: "You don't current qualify for a Microsoft 365 Developer Program sandbox subscription." As such, I cannot follow the instructions provided. Assistance would be appreciated.

Best regards,

Tsun Li Nicholas Tam
